

300w Black Quartz Crystal Igniter

After long development and experience, 300W Black Quartz Crystal Igniter is a very good solution on the pellet ignition market. With only a small part of the required energy, GREEN WAY black quartz crystal heater burns the pellets in a few seconds. At a significantly higher temperature than a ceramic lighter, the ignition is reduced to less than 60 seconds.

Model:quartz igniter

300W Black Quartz Crystal Igniter

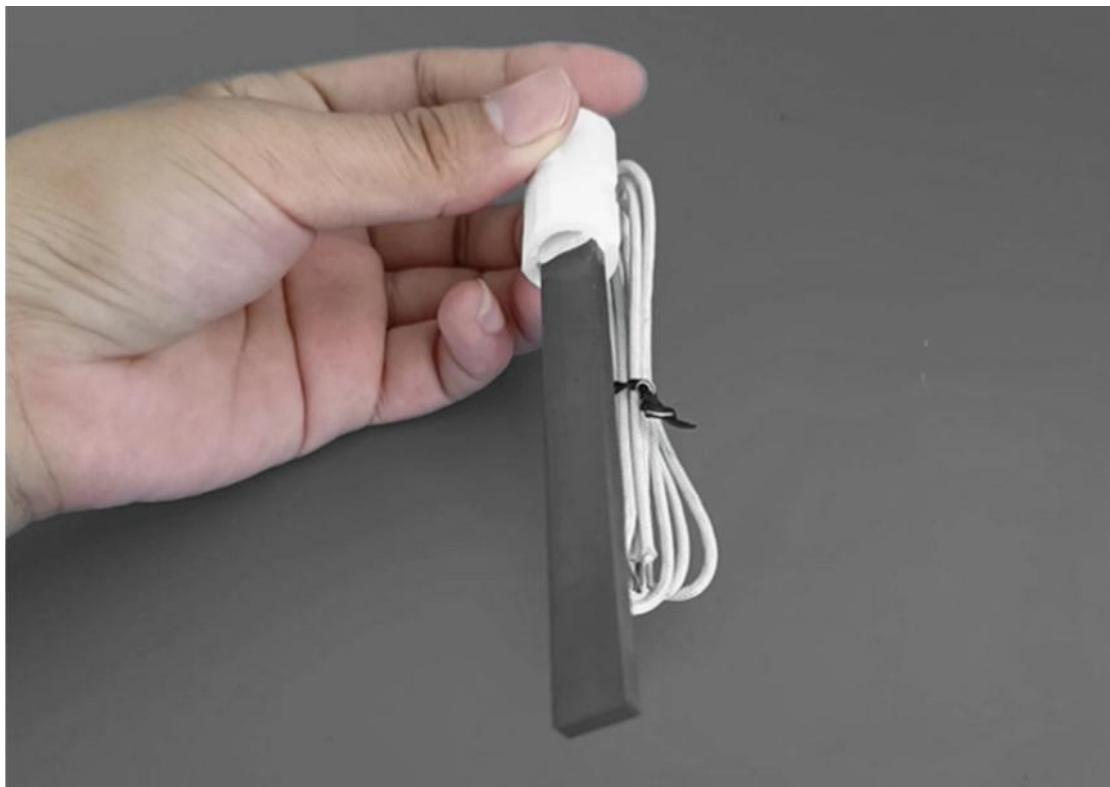

After long development and experience, **300W Black Quartz Crystal Igniter** is a very good solution on the pellet ignition market. With only a small part of the required energy, GREEN WAY black quartz crystal heater burns the pellets in a few seconds. At a significantly higher temperature than a ceramic lighter, the ignition is reduced to less than 60 seconds.

MORE DETAILS of 300W Black Quartz Crystal Igniter:

Copper Thread G3/8 or Ceramic flange; Diameter: 11.5 x 4 mm.

Overall length: 126 mm; Heating part length: 90 mm

Power: 300 Watt.; Temperature: 1000 ° C

Advantages of 300W Black Quartz Crystal Igniter:

- Unlike the alumina ceramic heater, in case of contact with the ash or the pipe holder, it does not create a short circuit.
- Quartz Crystal igniters are 2 times more resistant to mechanical shocks than ceramic lighters.
- High resistance to burning pellets.

The black quartz crystal igniter (candle, lighter) reaches over 1000 ° in 10 seconds, also called quartz igniter is the new generation for burning pellets and other biomass boilers.

Maintenance is even simpler.

Our Advantage

1. Quartz crystal igniter Factory/manufacturer
2. On-line Employees more than 150~200
3. Customization are welcome
4. Heater igniter Month Capacity: 550,000 piece
5. Quick Delivery time for already models: 1-3 days

6.Quartz crystal igniter t Samples are available
